

SWIPE FOR ANSWER

Write a program to find profit and loss

@PYTHONCODE11

CODE

```
cp=float(input("Enter the cp:"))
sp=float(input("Enter the sp:"))
if cp>sp:
    amount=cp-sp
    print("Total Loss:",amount)
elif sp>cp:
    amount=sp-cp
    print("Total Profit",amount)
else:
    print("No Profit No Loss")
```

@PYTHONCODE11
