Write a program to sum of three given integers. However, if two values are equal sum will be zero.4

@PYTHONCODE11

CODE

```
x=int(input("Enter number 1"))
y=int(input("Enter number 2"))
z=int(input("Enter number 3"))
if x==y or y==z or x==z:
    sm=0
else:
    sm=x+y+z
print(sm)
```
