Write a program to convert seconds to day, hour, minutes and seconds.

CODE

```python
time=float(input("Input time in seconds:"))
day=time//(24*3600)
time=time%(24*3600)
hr=time//3600
time%=3600
mins=time//60
time%=60
second=time
print("d:h:m:s->%d:%d:%d:%d"%(day,hr,mins,second))
```
